Striped Skunk By Dinopunch

This realistic looking striped skunk comes with 12 animations ready for Mecanim. The moving animations contain root motion which makes set up a snap.

There are 2 included Animation Controllers. The controller named "raccoonAnimationControllerDemo" does not contain any transitions while the other does. Transitions should be set up in a manner that is suitable for your project and all animations are designed to transition smoothly.

A Bumped Specular Material is included to take advantage of the Diffuse-Specular-Normal maps at 2k resolution.

I hope you enjoy this asset. Please email any questions, comments, or concerns to help@dinopunch.com or reach me on twitter @Dinopunch

Thank You!
